

Satellite **sat** **el** **lite** (**sat**'**l-it**') **noun** **1.** An object that moves around the Earth or some other object rather than falling onto it. **2.** A body whose center of mass is located in another. **3.** One who supports and adheres to another. **4.** A minor structure accompanying a more important or larger one. **5. adjective** surrounding and dominated by a central authority or power. **6. artificial** It was the English science fiction writer Arthur C. Clarke who conceived the possibility of artificial communication satellites. Clarke examined the logistics of satellite launch, possible orbits and other aspects of the creation of a network of world-circling satellites, pointing to the benefits of high-speed global communications. **note** It is not always a simple matter to decide which is the satellite in a pair of bodies. Because all objects with mass are affected by gravity, the motion of the primary object is also affected by the satellite. **synonyms** dependency, outpost, flight path, settlement, protectorate, addiction, reliance, need, habit, craving.

S

The city as an island.

Syzygy (si·zidzi). 1656. [- late L. *syzygia* - Gr. *σύζυγία* yoke, pair, copulation, conjunction, f. *σύζυγος* yoked, paired, f. *σύν* SYN- + **ζυγ-* (base of *ζευγύναι*) YOKE.] **1.** *Astron.* †**a.** Orig. = CONJUNCTION 3. -1704. **b.** Now extended to include both conjunction and opposition (OPPOSITION 3) of two heavenly bodies, or either of the points at which these take place, esp. in the case of the moon with the sun (new and full moon). **2.** *Biol.* **a.** A suture or immovable union of two joints of a crinoid; also, the joints thus sutured. **b.** The conjunction of two organisms without loss of identity, as in the genus DIPLOZOOM; a syzygium. 1873. **3.** *Anc. Pros.* A dipody, or combination of two feet in one metre 1836. **4.** *Math.* A group of rational integral functions so related that, on their being severally multiplied by other rational integral functions, the sum of the products vanishes identically; also, the relation between such functions 1850. **5.** A pair of connected or correlative things; in Gnostic theology, a couple or pair of opposites, or of æons 1838.

T

I follow the line of my flight path and mark the point where the city I am heading toward becomes more real than the city I have left.
